Are you EMV compliant?

ARBA Retail Systems has worked with VeriFone to interface our AR-BAPRO Point-of-Sale Software Solution with VeriFone's EMV-Compliant POINT Payment Solution.

Moving to the POINT Payment Solution will:

- Allow you to continue using your existing register hardware with the addition of a customer facing VeriFone payment device, which is leased as part of a per month per subscription basis.
- You can use your existing PAYware Connect account information and your current IPCharge Merchant portal.
- There is no longer a fee based on the number of transactions you do per month, instead it is a flat rate for the month that covers your VeriFone hardware and the services.
- It allows you to accept payment via Debit with PIN and a signature capture for the credit card swipe.

“EMV Cards (also called “Chip Cards” or “Smart Cards”) are credit cards embedded with a chip containing your encrypted credit card data.”
